No report for Strategic Plan.

Liaison to New Jersey Council of Community Colleges
Trustee Miller stated, "The council continues to have interest in study of Trifecta of Inequities.
The inequality is categorized in three areas: inequality of wealth, inequality of income and inequality of
opportunity. The council is concerned with the trend line in New Jersey for enrollment at community college
which has a slight decrease. Bergen Community College has the best enrollment profile in the state of New
Jersey. A factor for decline is tuition cost, which is a major component in national student debt. This is a huge
burden for students. At the council level, we are trying to devise legislative initiatives which will encourage
state and federal resources to help those particularly identified students."

ALUMNI TRUSTEE REPORT
Lorraine Derwin reported that the new printing procedure team met and moving forward. Good luck to the

The anticipated payment to BRP is not to exceed $81,600.00.
E/SA1 - To authorize collaborating with Passaic County Community College and the NJ Council on County Colleges on submission of a grant proposal to Achieving the Dream for their “Open Educational Resources Degree Initiative,” and to authorize President B. Kaye Walter, or her designee, to execute required documents.

Approval is granted for The Open Educational Resources (OER) Degree Initiative seeks to boost college access and completion for underserved students by engaging faculty in the redesign of courses and degree programs through the replacement of proprietary textbooks with open educational resources. Robust collections of Open Education Resources have been developing in connection with TAACCCT and other grant funded projects. Opportunities are now emerging that can enable educators and students to utilize free and low cost resources in pursuit of certificates and degrees. Over the next three years, ATD’s Open Educational Resources Degree Initiative will lay the groundwork for nationwide adoption of OER Degrees. Recognizing the growing expertise and interest in developing OER degrees beyond US borders, the Open Educational Resources Degree Initiative invites two-year public higher education institutions and systems in the U.S. and Canada to apply for three-year grants to support the creation of new OER Degree programs. Bergen Community College and Passaic County Community College propose to collaborate on this initiative. Programmatic and budgetary specifics are in development and will be forthcoming. Twenty-five percent (25%) college match is required.

E/SA2 - Authorize collaborating with Bergen County Technical Schools and Special Services in development and submission of a grant proposal to NSF on “Inclusion of Underrepresented Discoverers,” and to authorize President B. Kaye Walter, or her designee, to execute required documents.

Approval is granted for the purpose of The NSF INCLUDES grant is to establish partnerships that develop and pilot innovative approaches to increased engagement of underrepresented groups in Science, Technology, Engineering, and Mathematics (STEM) education and careers. While not yet finalized, it is expected that this initiative might emphasize robotics, 3D printing, CAD, and related hands on “maker” activities that could include integrated math, science, literacy (technology) and career awareness (21st Century Skills) that address College/Career Readiness Standards. Project activities will target underrepresented youth, women, people with disabilities, minority, low income individuals, but will also include significant components targeting Teachers and Counselors. Bergen will take the role of lead agency with Bergen County Technical Schools serving as the key secondary school partner. Other alliance members are expected, including NJIT, NJCU, Latinas in Engineering, local libraries, community based organizations, as well as industry and employer representatives. Programmatic and budgetary specifics are in development and will be forthcoming. No college funds are required.
E/SA3 – Authorize submission of a grant proposal to the US Department of Education “Educational Opportunity Center Grant Program,” and to authorize President B. Kaye Walter, or her designee, to execute required documents.

Approval is granted for this proposal is for a five year project in the amount of approximately $1 million to develop and implement an Educational Opportunity Center (EOC) at the Bergen Community College Philip Ciarrocco, Jr. Adult Learning Center in Hackensack. The purpose of the proposed EOC is to provide information and assistance regarding financial and academic support available for qualified adults who want to enter or continue pursuit of postsecondary education; provide assistance in applying for admission to Bergen’s education programs, help participants prepare admissions and financial aid applications; and assist in improving the financial and economic literacy of program participants. The overarching goal is to aid participant transition to college and “living-wage” occupations by providing academic and career counseling, tutoring, and mentoring. The program is designed for over 1,000 traditionally under-represented participants, such as out of school youth, low income individuals, limited English speaking individuals, persons with disabilities, and or other disconnected students. The project will employ new social media and marketing approaches to promote the Bergen Educational Opportunity Center (BE-OP) as the place where disconnected adults can gain serious support for moving forward with their academic and career development efforts.

More specific program and budget details are in development and will be forthcoming. No college funds are required.

E/SA4 - Authorize the execution of an agreement with the National student Clearinghouse for an amount not to exceed $7,658, billed upon the terms and conditions detailed in the Agreement, and further to authorize President B. K. Walter, or her designee to execute required documents.

Approval is granted for Bergen's recently awarded USDOL- TAAACCT grant requires conduct of an evaluation of the consortium’s performance under the grant. One element of that evaluation requires that we report on the future academic pursuits of sponsored students. Our Evaluation plan includes surveying exiting students, but the literature suggests that self-reporting of this data element is unreliable. The National Student Clearinghouse collects student-level academic enrollment information from bursar offices at colleges across the Country, and thus it is the most reliable source for securing this information. Combining both data sets will give us the most accurate picture of our performance, and thus contribute immeasurable to our final TAAACCT Evaluation Report.
